

(a) Executed false actions

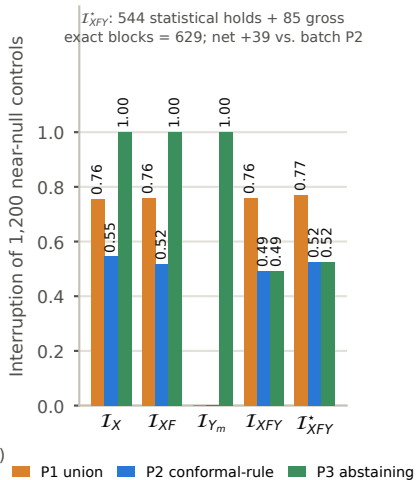

Bars: pooled rate; whiskers: range of the eight per-environment cluster means. Dashed: nominal 0.05; the 1.2.0 rule is superseded; conformal exact level 10/201 = 0.0498.

(b) Batch policy trade-off

(c) Near-null control interruption

Same 1,200 rows for every regime; synthetic near-null variation, not operational traffic.
